EWACC2010. ENERGY WATER AND CLIMATE CHANGE IN THE MEDITERRANEAN AND THE MIDDLE EAST

11-15 January 2010, NICOSIA, CYPRUS

=====

Dear Colleagues and friends,

We are pleased to encourage you to attend the international conference on "Energy, Water and Climate Change in the Mediterranean and the Middle East" organised by the Energy, Environment and Water Research Center (EEWRC) of The Cyprus Institute that takes place in Nicosia, Cyprus, the 11-15 January 2010. Scientists, stakeholders, policy makers and interested individuals are cordially invited to the conference.

The conference takes place under the patronage of the President of the Republic of Cyprus and brings together distinguished scientists, primary stakeholders, policy makers and high-level officials to discuss the present and emerging challenges posed by climate change in the Mediterranean and the Middle East. This region, being exceptionally vulnerable to climate change, requires cooperative management strategies in order to address its economical and societal consequences.

The conference will contribute to these needs by:

- discussing the state-of-knowledge of climate change and its challenges;
- setting the stage for cooperative strategies to cope with climate change impacts;
- discussing energy and water policies and evaluating new concepts;
- considering sustainable strategies and effective decision making

The conference starts on the evening of Monday, 11 January with a public opening ceremony followed by a welcome reception. The actual conference program starts on Tuesday, 12 January and closes on Friday, 15 January. Attached, please find the preliminary program for the conference. The full conference program, practical information about the venue, and accommodation and the registration form are available on the conference website: <http://ewacc.cyi.ac.cy/>. Registration will close on December 22, 2009.

We sincerely hope you will be able to come to attend this important event.

With kind regards,

Jos Lelieveld,
The Cyprus Institute/ Max Planck Institut Mainz
Conference Chair EWACC2010
