"Equality of women and men is a fundamental value of the European Union and is vital to economic growth, prosperity and competitiveness.

Women are paid 16.2% less than men for the same work. Women have been hit harder by the economic crisis through higher unemployment and more insecure jobs. Women are still largely underrepresented in political and economic decision-making.

We need a step change in the fight for gender equality: this is a cultural, political and economic struggle which we must all commit to."

President of the European Parliament Martin Schulz
