Press Release

LOPEC 2020 will not take place

Due to the increasing spread of the coronavirus (COVID-19) in Europe and on the basis of the recommendations of the Bavarian State Government as well as of the responsible health authorities, Messe München is under obligation to not host LOPEC 2020. This measure is taken in consultation with the industry association OE-A, co-organizer of LOPEC, and in responsibility for the health of exhibitors and visitors. The next LOPEC will be held on March 23 to 25, 2021.

Falk Senger, Managing Director of Messe München and the executive who oversees LOPEC, says: "In close consultation with our LOPEC partner OE-A and our exhibitors, it is unfortunately not possible for us to successfully hold the event this year for participants of the Exhibition and Conference. Canceling LOPEC 2020 was a painful decision. By making it, we have assumed our responsibility for the health of our exhibitors, conference speakers and visitors." Klaus Hecker, Managing Director of the industry association OE-A, adds: "The OE-A supports this step. We will now put all our energy into organizing a successful LOPEC 2021."

Key topic: printed electronics as part of electronica

As planned, the topic of printed electronics will play a key role during the world's leading trade fair electronica from November 10 to 13, 2020. Interested individuals can participate as part of a joint LOPEC/OE-A booth and an expanded forum program.

Press Release | March 6, 2020 | 2/2**LOPEC**

LOPEC (Large-area, Organic & Printed Electronics Convention) is the leading international event for printed electronics. The combination of an exhibition and a conference is the perfect way to depict the complex and dynamic nature of this young industry. More than 2,700 participants from 44 countries attended the event in 2019. There were 163 exhibitors from 19 countries, and more than 200 conference presentations from 25 countries. LOPEC is organized jointly by the OE-A (Organic and Printed Electronics Association) and Messe München GmbH. The next event takes place from March 23 to 25, 2021 at the ICM – Internationales Congress Center München in Munich, Germany. www.lopec.com

Messe München

Messe München is one of the leading exhibition organizers worldwide with more than 50 of its own trade shows for capital goods, consumer goods and new technologies. Every year, a total of over 50,000 exhibitors and around three million visitors take part in more than 200 events at the exhibition center in Munich, at the ICM – Internationales Congress Center München and the MOC Veranstaltungszentrum München as well as abroad. Together with its subsidiary companies, Messe München organizes trade shows in China, India, Brazil, Russia, Turkey, South Africa, Nigeria, Vietnam and Iran. With a network of associated companies in Europe, Asia, Africa and South America as well as around 70 representations abroad for over 100 countries, Messe München has a global presence.

OE-A

The OE-A (Organic and Printed Electronics Association) was founded in December 2004 and is the leading international industry association for organic and printed electronics. The OE-A represents the entire value chain of this industry. The members are world-class global companies and institutions, ranging from R&D institutes, mechanical engineering companies and material suppliers to producers and end-users. Well over 200 companies from Europe, Asia, North America, South America, Africa and Oceania are working together to promote the establishment of a competitive production infrastructure for organic and printed electronics. The OE-A is building a bridge between science, technology and application. The OE-A is a working group within VDMA. www.oe-a.org
