

Medicover Genetics is a leading healthcare company specialising in genetic medicine, with more than 25 years of experience in genetics diagnostics. Medicover Genetics offers genetic testing services and genetic counselling, proprietary CE-IVD marked solutions and a unique Technology Transfer Platform which enables partners to perform high fidelity genetic tests in-house. With our services in over 30 countries across Europe, Asia, and Africa, we empower laboratories, healthcare professionals and patients to place genetics at the core of medical decisions. Committed to enhancing health and well-being, we provide meaningful, actionable diagnostic solutions, improving disease prognosis, clinical management, and therapy selection for genetic disorders. The laboratories are CAP and ISO 15189 accredited, CLIA, ISO 9001, and ISO 13485 certified, and comply with GMP and GCP, ensuring the highest quality standards.

YGIA Polyclinic was founded in 1983 in the centre of Limassol city and welcomed its first patients in 1987. For 38 years now, YGIA Polyclinic has been a pioneer, offering high quality patient-oriented services, applying the most advanced and scientifically proven medical protocols and state-of-the-art equipment. As of September 25, 2023, YGEIA Polyclinic has been integrated into the General Health System, offering all its services to patients, including the Accident and Emergency Department. The Management of YGIA, has adopted an Integrated Management System that includes the most prestigious international accreditations and certifications (ISO 9001:2015, ISO 14001:2015, ISO 15189:2012, ISO 27001:2013, ISO 45001:2018, ISO 22000:2018, CHKS, Cyber Essentials Plus). Based on these, YGIA Polyclinic is able to ensure the provision of high quality services, medical - nursing and hospitality - service, in the safest environment, both for employees, patients and partner physicians.

The Cyprus Institute of Neurology & Genetics

The Cyprus Institute of Neurology & Genetics (CING) is a private, non-profit, bi-communal medical research and academic institution. CING is committed to alleviating the suffering of patients and their families while working to prevent diseases through patient care, research, and educational initiatives focused on neurological and genetic disorders. These include conditions such as muscular dystrophy, multiple sclerosis, epilepsy, chromosomal abnormalities, and various aspects of molecular biology and genetics, such as thalassemia, molecular virology, intellectual disabilities, cardiovascular diseases, stroke, cystic fibrosis, and neurogenetics. Additionally, CING plays a vital role in combating crime by offering specialized DNA services to law enforcement agencies and providing expert testimony in criminal and civil cases. Functioning as a medical and biomedical translational center, CING represents a highly effective model that integrates education, services, and research, delivering significant medical benefits to individuals, society, and the nation. It was among the first and remains one of the premier examples in Europe, of successfully merging postgraduate education, research, and service. CING has gained international recognition and serves as a vital national, regional, and international center of excellence, offering high-quality services, innovative research, and postgraduate education.
